

During the last years students from all around Europe have started to choose Modena for their studies, especially thanks to the Socrates/Erasmus Programme.

Knowing which kind of difficulties students can face when they decide to go abroad to spend part of their life, and since there have never been associations able to support them in Modena, here it's where the idea of Enea Modena was born.

This Association has recently been founded by students that have been in Erasmus and, in general, by students that are particularly interested in fostering integration with other students from all Europe.

The only goals of the Association are to welcome incoming students and foster their integration with local people, thanks to different kind of activities, such as orientation at university and leisure activities.

A lot of us know how people can feel during their first moments in a foreign country, therefore we want to ensure every foreign student arriving in Modena that in case of necessity there is someone for them.
